

ACUMEN ENERGY LTD

Acumen Energy Ltd provides environmental solutions to businesses throughout the UK. Specialising in the collection and recycling of waste oil and hazardous automotive waste streams, AEL collect contaminated fuels, oil filters, oily rags, spill absorbent granules, antifreeze, solvents, batteries and brake fluid. We are also a provider of parts washers and offer Industrial Site Services, such as decontamination and decommissioning projects as well as tank cleaning and on or off site waste treatment services.

National Coverage

From our fully permitted processing facility in Wolverhampton and our network of depots in Stockton, Leeds and Essex, we are able to provide nationwide coverage with a next day service in the north, midlands and Home Counties.

Professional and Efficient Service

We offer a professional and efficient service with the focus on materials recycling and recovery, ensuring our client's environmental impact is minimised and that difficult and hazardous waste is managed and disposed of in the most sustainable way.

ISO Accreditation

Acumen Energy Ltd proudly boast ISO accreditations for 18001, 14001 and 9001. Upholding the highest standards and meeting the most stringent approvals is at the core of our business and the top of our agenda. By maintaining this accreditation we are ensuring excellent procedures, environmental responsibility and high health and safety standards for both the business and our customers.

Clear Intelligent Thinking

Acumen Energy process more than 700,000 tonnes of used oil and emulsions, converting them back to high quality oil products and lubricants. Our approach is to offer clear and intelligent thinking that gives our customers maximum benefits. At Acumen Energy we help our customers understand how they can achieve cost benefits and environmental improvements through:

- Waste Oil Recycling and Recovery
- Waste Elimination
- Waste Minimisation
- Conventional Waste Management
- Waste Storage Concepts

PERFECT
LUBRICATION

BRILLIANT CARBON
FOOTPRINT

Part of the Avista Oil Group

Throughout Europe, Avista collect used oil direct from consumers which then goes on to be processed through one of the AVISTA OIL refineries.

The patented "Enhanced Selective Refining" process is used to re-refine and 'upcycle' the used oil: an almost waste-free process which, according to our own tests, reduces CO2 emissions by at least 30% as compared to the conventional production of base oil. The high-quality synthetic components of the used oil are completely retained.

We then supply the re-refined products back to the customers who can use them again as lubricants thereby generating a cycle which sustainably reduces costs, CO2 emissions and helps preserve resources and can be repeated.

24 Hour Spill Response

As accredited spill responders we offer a highly trained and experienced team to respond to all types of land and water spills. We attend to emergencies such as:

Fuel oil spills, chemical and toxic substance spills, emergency clean ups, water contamination, hazardous substance identification and chemical and hazardous substance RTA incidents.

We will provide: vacuum tankers, drums and packaged waste re-packaging, high pressure jetting, remediation, waste collection and disposal.

First Line Responders

We are first line responders for emergency response, environment protection, working with HSE and EA and the emergency services.

Make sure you have our hotline number - 0843 6580513

Providing a Nationwide Service

Our multiple service locations throughout the UK means we can provide UK-wide coverage for the collection of waste materials.
