mobile soil treatment plant

Land Remediation

Onsite treatment of contaminated soils and aggregates.

Acumen are offering a bespoke mobile soil washing plant to provide remediation services for the clean up of contaminated land throughout the UK.

The mobile plant will be suitable for mobilisation onto sites with 1000 cubic metres plus of contaminated soil that requires remediation.

The Plant incorporates a unique range of solutions designed to remove a wide range of organic and inorganic contaminants from soil excavations including:

- Hydrocarbons
- Toxic & Hazardous Compounds
- Heavy Metals
- Inorganic Fractions

The Acumen plant will compliment the services already offered to the land remediation industry.

Benefits of onsite treatment

- Eliminate transport costs
- Reuse of washed material on site
- Reduce / eliminate cost of purchasing backfill and landscaping material
- Reduced carbon footprint

Mobile Soil Washing can assist with:

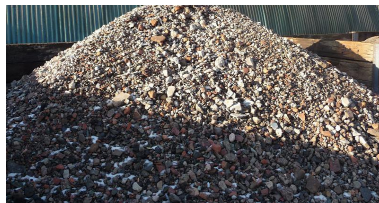

- Recovery of contaminated sites
- Brownfield re-development
- Large scale spill clean up
- Landfill excavation and remediation
- Bespoke project work
